

Part 4 - College/School Tuition Waiver Policy Charts for 2012-2013

A table of the policies for all graduate programs listed by college or school can be found by following the links below.

Cost Recovery and Self-Supporting Programs

These programs have unique tuition and fee waiver requirements and tuition schedules, and so are an addendum to the [Tuition Waiver Policy](#) ^[1].

Cost recovery programs are those that:

- are allocated no state funds and must generate all costs through tuition and fees,
- are approved by the Board of Trustees, and
- are exempt from all tuition and fee waiver programs, but
- must honor statutory waivers.

Self-supporting programs are those that:

- receive no direct state subsidy (general revenue funds),
- may depend on a special Board of Trustees approved tuition rate to cover additional costs of developing and offering the program,
- are usually aimed at non-traditional audiences (e.g. professional, off-campus, online), and
- are exempt from all tuition and fee waiver programs, but
- must honor statutory waivers.
